OUR STORY

In the Beginning

The story of Rocky Mountain Hardware unfolded over three decades ago in a successful showroom owned by co-founders Mark and Patsy Nickum. Working closely with architects, designers and builders in Sun Valley, Idaho, they furnished high-end doors, windows and door hardware for upscale, custom-built homes.

Born of Necessity

The Nickums quickly realized the need for quality, customized products, as their clients repeatedly asked for pieces that simply didn't exist. They were looking for accessories that would tie their projects together—products with one-of-a-kind character that could be used throughout the entire house to unify the look. Without customized pieces, their clients were settling for something ordinary rather than staying true to the design of the home and making those finishing touches exceptional.

Never Say No

Whenever a need arose on a project for a particular type of hardware that just couldn't be found, it was created. Starting with one lever and one plate, their clients asked, "Can you do the doorstop?" Their reply? "Sure. We can do a doorstop." The doorstop evolved into a cabinet knob for the kitchen, then on to all the hardware in the bath. Next stop, door accessories and hinges, and finally plumbing and lighting. It comes as no surprise that the Nickum's philosophy of never saying "no" was the inspiration behind the creation of Rocky Mountain Hardware. And that was just the beginning.

Next Chapter

Today, over 20 years later, Rocky Mountain Hardware continues its family tradition with their son Christian at the helm. Their unwavering commitment to high-quality, custom bronze pieces is unparalleled. The creation of that next sculptural work of art is already in the works. As for the future? They can't wait for the next request.

PHILOSOPHY

Living and Working Green

Nestled in the mountains of Hailey, Idaho, Rocky Mountain Hardware's flagship facility is a true testament to their core values. When they decided to expand their company, they started from the ground up—literally. Their goal to design a structure that balanced environmental responsibility with the health and happiness of their employees earned the company LEED® Gold Certification, a high honor granted by the U.S. Green Building Council.

But their dedication to creating a better, greener place goes beyond brick and mortar. Rocky Mountain's philosophies serve as a foundation for how they conduct business—from handcrafting high-quality products, all in the USA, to environmental stewardship and the well being of their employees.

Balancing Act

As family-owned business, they truly understand that every employee is integral to the company's success. They also appreciate how leading a balanced life impacts the bottom line. That's why the company offers little perks that make coming to work fun. There's a gym, horseshoe pit and basketball court in addition to classes for kettlebells, yoga and pilates.

Sustainability

Rocky Mountain Hardware is dedicated to green practices when it comes to manufacturing products, too. Each piece of hardware is cast of 90% post-consumer recycled bronze—a fact which can contribute towards earning LEED® points. All sand used to cast molds is reconditioned on a regular basis for reuse, resulting in zero waste. Bronze chips and grinding dust are also recycled with absolutely no byproduct. And, at the end of the line, each piece is finished in our eco-friendly patina process to create the beautiful hues for which we are known.

Because at Rocky Mountain Hardware, living green is more than just an ideal, it's a way of life.

All products cast of 90% post-consumer recycled bronze.

Made in the USA.

THE ART OF CREATION

Old-World Artistry

The art of sculpting molten bronze into intriguing silhouettes dates back thousands of years. Today, our highly skilled artisans draw up the same time-honored traditions that have been passed down through the generations to handcraft hardware and accessories of uncommon beauty and enduring style.

Using Old-World casting techniques, each product touches no less than 30 hands, undergoing a rigorous 20-plus-step process that begins in our pattern shop. An expert craftsman begins by hand sculpting imaginative ideas into pattern boards to create casts using sand or wax.

Sand Casting

Sand is compacted tightly to both sides of the pattern board. Once set, the boards are removed, and each half of the mold is carefully inspected. The halves are placed back together, forming a cavity to hold the molten bronze.

Next, 300 pounds of bronze ingots are melted in a crucible, reaching a temperature of 2,200°F. The bronze is poured by hand into the casts and left to cool. After cooling, the product is removed and sent on for finishing.

Lost-Wax Casting

For designs that are a bit more intricate, the art of lost-wax casting is employed. This process is extremely time intensive as the wax molds are dipped in a ceramic slurry multiple times and must dry completely between each dip.

The molds are placed in kilns to harden. Then, hot molten bronze is poured into the cavity. Once hardened, the shell is cracked off by hand to reveal the bronze piece nestled inside.

Finishing Touches

Once in the studio, the artistry and detail of the pieces are highlighted with a warm, hand-applied patina and hand-rubbed polish. The finish grows richer and deeper over time as it responds to its environment for one-of-a-kind character.

The end product is a sculptural work of art, the handiwork of many, and one that is expertly crafted to last a lifetime.

CUSTOM

Your Idea, Our Inspiration

For nearly two decades, Rocky Mountain Hardware has looked to our clients for inspiration. The philosophy to "never say no" is the foundation from which our company was built upon. Today, we continue that tradition, partnering with customers to create one-of-a-kind designs with true artisan appeal.

Uniquely Yours

From small modifications of an existing collection to an original design reimagined in bronze, no project is too big, or for that matter, too small. Whether working from a rough sketch or verbal exchange, our in-house design and engineering team have both the experience and tools to turn every idea into a sculptural work of art.

Exacting Precision

Our team works closely with each client to identify the most appropriate method to create the initial pattern. Our sophisticated 3-D computer modeling program and rapid prototyping machine are often selected to recreate geometric designs. Or, for more organic designs, our skilled artisans hand carve intricate patterns from wood. From here craftsmen seamlessly combine Old-World casting techniques—with state-of-the-art precision machinery to achieve a perfect end result, capturing every subtle nuance with exact tolerances.

One-of-a-Kind Character

Each piece is given a lustrous, hand-applied patina that responds to time and its environment for a look that's truly unique. We can also match a wide spectrum of finishes beyond the standard 10 offered to complement your existing aesthetic.

To speak to a designer about your custom projects, please call 888-788-2013.

ARTISAN COLLECTION

TED BOERNER COLLECTION

With a well-earned reputation as a designer of exceptional furniture for more than two decades, Ted Boerner has created pieces for a range of markets, from medium range prêt-à-porter furniture to high-end, made-to-order couture work. A natural fit for Boerner, who has been using hardware on his cabinets and furniture, this collaboration in bronze incorporates design principles that Rocky Mountain Hardware is known for, yet brings a fresh new approach.

The five collections—Brut, Shift, Empire, Bird and Tab—offer a range of sculptural looks, including chunky handles and asymmetrical knobs and pulls, each embracing Boerner’s signature balance of intimacy and emotion. “These pieces are created in relationship to the eye and the hand,” Boerner says. “They celebrate touch, feeling and an immediate sense of human scale.” The line is produced with sand and investment casting techniques that employ a high level of handwork and give each piece a distinct feel.

View his collection on pages 130–131.

ROGER THOMAS COLLECTION

Our Artisan Collection also includes a collaboration with hospitality and interior designer Roger Thomas. As Vice President Design for Wynn Design and Development, Thomas is known for his luxurious interiors which are grounded in his deep appreciation of design history. For the Paris Collection, he stripped away extraneous details to capture the timeless essence of his sources. "Though the Paris Collection has the sobriety brought to it from great 18th century design, there's still a lightheartedness," Thomas says. "That's something that I've always found and honored in French design—although it's very serious, it never takes itself too seriously."

Combining the Old World casting techniques with 21st century innovation, the Paris collection includes both door and cabinet hardware that embody his trademark.

View the door hardware collection on pages 92–97 and the cabinet hardware collection on page 130.

(WM)

WHITE BRONZE,
LIGHT PATINA
(WL)

Rocky Mountain Hardware's highly skilled artisans use Old-World casting techniques to handcraft imaginative designs from art-grade bronze of exceptional quality. Each piece begins with one of two base metals—white bronze, prized for its burnished silvery hue or silicon bronze, characterized by its rich coppery coloration. The artistry of the design is highlighted with a warm and lustrous patina, applied by hand to create a wonderfully aged appearance. A hand-applied wax finish allows each piece to wear beautifully over time, with absolutely no lacquers or coatings used that could potentially chip or peel. The patina responds to its individual environment—time, touch, climate—so that each shade distinctly reflects its surroundings for one-of-a-kind character.

MADDOX

Characterized by its **inviting** oval shape and **intricate** beaded details, our Maddox Collection has a **formal** look and feel that complements the traditional style of Colonial and Brownstone architecture. Each piece is **individually crafted** in a labor-intensive process using the Old-World art form of **lost-wax** casting. From start to finish, every design touches no less than 30 hands.

MADDOX

ELLIS

ELLIS

Paying tribute to its **traditional** architectural heritage, our Ellis Collection is exemplified by classic, **ornate details** achieved through Old-World casting techniques. The time-honored art of lost-wax casting is used for the **intricate rope** detailing and arched plate, while a hand-applied patina highlights the intricate, **hand-carved design**.

ABOVE: Ellis thumbblatch entry escutcheon (G033) shown with the Ellis grip (G060) in white bronze, light patina.

FACING: Ellis interior door escutcheon (E005) shown with the Ellis knob (K075) in silicon bronze, light patina.

BRIGGS

Designed to **blend** beautifully with a variety of architectural styles for an **eclectic** look, our Briggs Collection borrows its design aesthetic from an intriguing array of stylistic influences—from the **intricate** grates found in **Morocco** to the doorknobs of a cathedral built in the 1800s. Each design sits well in a variety of settings, making it one of our most **unique** assortments.

FLEUR DE LIS

FLEUR DE LIS

A vertical, ornate metal door pull with a fleur-de-lis design. The pull is made of a dark, possibly brass or bronze, material with a lustrous patina. It features a central oval medallion with intricate scrollwork and a fleur-de-lis motif. The top and bottom of the pull are pointed and flared, with decorative cutouts. The background is a soft, blurred gradient of light colors.

A revered emblem of **royalty**, the fleur-de-lis remains an enduring symbol of France. Literally translated in French as "**lily flower**," its three distinct petals add a decorative flourish to traditional interiors. A **lustrous**, hand-applied patina highlights the subtle **nuances** of its classic design, and will only grow deeper and richer over time.

ABOVE: Fleur de Lis thumbblatch entry (G841) shown with the Sun Valley grip (G606) in silicon bronze, light patina.

FACING: Fleur de Lis passage escutcheon (E841) shown with the Monarch lever (L130) in silicon bronze, medium patina.

PARIS

In collaboration with renowned hospitality designer **Roger Thomas** comes our Paris Collection, a study in the historical styles from 17th- and 18th-century **France**. Cast from solid, art-grade bronze, Thomas has **distilled** the collection down to its **purest** form, stripping away extraneous details typical of the era to capture the timeless **silhouettes** presented in our collection.

PART #	SPDSP2	SIZE	4 9/16" x 4 9/16"
--------	--------	------	-------------------

Shown in silicon bronze, dark patina. Custom layouts are possible. Please call for options.

NAPKIN HOLDER

PART #	NH100	SIZE	1 3/8" x Ø2 1/8"
--------	-------	------	------------------

Shown in white bronze, light patina.

SUN MEDALLION

PART #	SUN2636	SIZE	34 1/4" x 34 3/4"
--------	---------	------	-------------------

Shown in silicon bronze, light patina. Supplied with six 2" x 3/8" screws for thru-bolting and mounting bracket.

ANTLER HOOK

PART # CH1 | SIZE 4 1/8" x 7 7/16"
Shown in silicon bronze, light patina.

COAT HOOK

PART # CH2 | SIZE 3 7/8" x 5 3/8"
Shown in silicon bronze, medium patina.

COAT HOOK

PART # CH3 | SIZE 3 1/8" x 3 3/8"
Shown in white bronze, medium patina.

COAT HOOK

PART # CH4 | SIZE 1 3/8" x 2 5/16"
Shown in silicon bronze, dark patina.

PEGGY HOOK

PART # CH5 | SIZE 2 5/16" x 4"
Shown in white bronze, brushed patina.

NAIL

PART # DN101 | SIZE 3" x 3/8"
Shown in white bronze, light patina.

CLEAT

PART # CLT100 | SIZE 5/8" x 3 1/4"
Shown in silicon bronze, dark patina.

GAS VALVE COVER

PART # GVC | SIZE Ø2 3/8" x 3 1/8"
Shown in silicon bronze, medium patina. Includes 12" extension with 5/16" square adapter. See page 104-109 for additional handle options.

MAIL SLOT

PART # MS112	EXTERIOR SWING DOOR PLATE AND INTERIOR PLATE WITH 12" x 2 1/4" CUTOUT	SIZE 18" x 3 1/2"
MSD112	EXTERIOR AND INTERIOR SWING DOOR PLATES	18" x 3 1/2"

Shown (MS112) in white bronze, dark patina.

PEAK MAIL SLOT COVER

PART # MSC105 | SIZE 13 1/2" x 3 1/2"

Shown in white bronze, medium patina.

SMALL BELL

PART # B6 | SIZE 5 7/8" x 11 3/16"
 Shown in silicon bronze, medium patina. Comes with leather strap.

LARGE BELL

PART # B12 | SIZE 16 1/2" x 16 3/4"
 Shown in silicon bronze, rust patina.

HORSESHOES AND STAKES

PART # HS110
 Approximate shoe weight is 2 1/2 lbs. "A" shoes (HS100BL) are shown in silicon bronze, light patina, "B" shoes (HS100WL) are shown in white bronze, light patina. Stakes (ST136) are 36" x Ø1" and shown in silicon and white bronze, light. Horseshoes and stakes can be ordered together or separately. Please call for options.

STAIR CARPET HOLDER

PART # SCH | SIZE UP TO 48" LENGTH
BRACKET OPTIONS

PART # CH101 | SIZE 1 11/16" x 1 11/16"

PART #	SIZE	WEIGHT
PE465	6" x 6"	7 LBS

Shown with E419 Ø6 1/2" Round escutcheon in white bronze, light patina. Refer to page 188 for escutcheon styles and specifications. Standard cable length is 10'.

BRAVO PENDANT—ROUND GLASS

PART #	SIZE	WEIGHT
PE450	4 3/4" x Ø4 3/4"	3 1/2 LBS

Shown with E419 Ø6 1/2" Round escutcheon in white bronze, light patina. Refer to page 188 for escutcheon styles and specifications. Standard cable length is 10'.

CHARLIE PENDANT

PART #	SIZE	WEIGHT
PE435	4" x 4"	5 LBS

Shown with E403 5 1/2" Square escutcheon in silicon bronze, brushed patina. Refer to page 188 for escutcheon styles and specifications. Standard cable length is 10'.

DELTA PENDANT

PART #	SIZE	WEIGHT
PE430	8" x 8"	40 LBS

Shown with E403 5 1/2" Square escutcheon in silicon bronze, brushed patina. Refer to page 188 for escutcheon styles and specifications. Standard cable length is 10'.

CHANDELIERS

CROSS ARM CHANDELIER—ROUND GLASS

PART #	SIZE	WEIGHT
C450	36 7/16" x 36 7/16" x 8'	50 LBS

Shown in white bronze, medium patina. Refer to page 188 for escutcheon styles and specifications. Maximum standard length is 8'.

CROSS ARM CHANDELIER—SQUARE GLASS

PART #	SIZE	WEIGHT
C455	36 7/16" x 36 7/16" x 8'	50 LBS

Shown in silicon bronze, rust patina. Refer to page 188 for escutcheon styles and specifications. Maximum standard length is 8'.

CUBE CHANDELIER—FLAT BOX

PART #	SIZE	WEIGHT
C400FB	22" x 22" x 10'	44 LBS
C405FB	22" x 44" x 10' DOUBLE CUBE	85 LBS

Shown (C400FB) in white bronze, medium patina. Refer to page 188 for escutcheon styles and specifications. Maximum standard length is 10'.

CUBE CHANDELIER—CORRUGATED BOX

PART #	SIZE	WEIGHT
C400CB	22" x 22" x 10'	44 LBS

Shown in silicon bronze, dark patina. Refer to page 188 for escutcheon styles and specifications. Maximum standard length is 10'.

TOWNE 3-ARM CHANDELIER

PART #	SIZE	WEIGHT
C525	Ø11 7/16" x 73"	33 LBS

Shown in silicon bronze, dark patina. Refer to page 188 for escutcheon styles and specifications. Fabric shade options, crystals, and prism are available as shown. See rockymountainhardware.com. Maximum standard length is 73'.

TOWNE 5-ARM CHANDELIER

PART #	SIZE	WEIGHT
C500	Ø28 1/2" x 77"	46 LBS

Shown in white bronze, light patina. Refer to page 188 for escutcheon styles and specifications. Fabric shade options, crystals, and prism are available as shown. See rockymountainhardware.com. Maximum standard length is 77'.

Rocky Mountain Hardware's broad tile collection consists of over 100 tile designs in five distinct lines: Organic-themed tile, a Geometric series of tile, a diverse line of Frame tiles, Field tiles and a range of Border tile. Our solid bronze tiles have been used in countless different settings—from adding texture and dimension to entryway floors to stunning backsplashes. Each tile is cast in art-grade bronze and is available in any of our 10 patina finishes. Visit our website to see our collection see www.rockymountainhardware.com

TOP: Basic tile (TT300, TT304, TT602, TT600, TT306) in silicon bronze and white bronze. Ellipse sink (SK319) and Deck Mount Faucet (DMF) with mini French levers (LW20), Gooseneck spout (P603) and Small bells (P301) in white bronze, light patina.

BOTTOM LEFT: Basic tile (TT308, TT600) shown in white bronze, dark patina.

BOTTOM RIGHT: Arched tile (TT620) shown in white bronze, light patina.

ABOVE: Acanthus grout through frame tile (TT422) and Pillow tile (TT519). Apron Front Farmhouse sink (KS4422) with the Deck Mount Faucet (DMF), Mini Harrington levers (LW60), Arched spout (P700) and Small bells (P301). Roswell cabinet knobs (CK254) and Front Mounting Sash pull (CK400). All shown in white bronze, light patina.

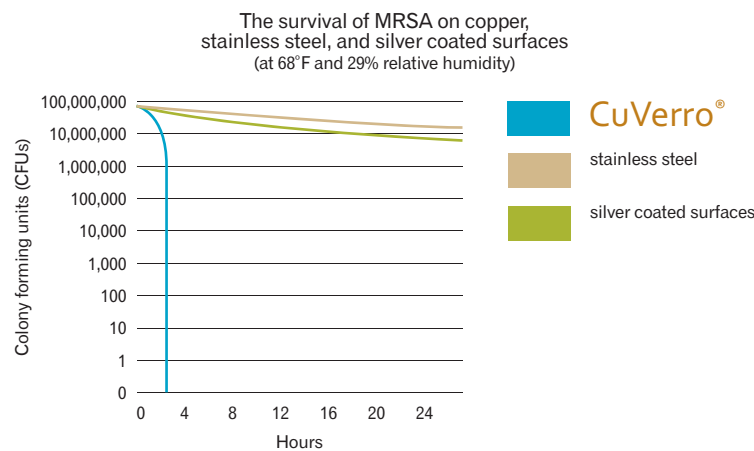

Introducing Rocky Mountain Hardware’s partnership with **CuVerro**® antimicrobial copper material

- **CuVerro**® antimicrobial copper is the only solid surface registered and recognized by the U.S. EPA with the inherent ability to kill bacteria* that are harmful to human health.
- All RMH products can be cast of **CuVerro**® antimicrobial copper materials.

Facts About **CuVerro**® antimicrobial copper surfaces:

- Surfaces kill greater than 99.9% of bacteria* within **two hours**, and continually kill more than 99% of bacteria* even after repeated contamination.
- Offers **24/7 protection against bacterial*** contamination on touch surfaces that can cause infections and pose a threat to human health.
- Helps **inhibit buildup** and growth of bacteria* between routine cleanings.
- Continuous antibacterial action **never wears** or washes away.

80% of transmitted diseases are transmitted by touch
“Secret Lives of Germs” by P. Tierno. Atria Books, NY

CuVerro® antimicrobial copper material can be used throughout our mainline by request. Please call or email us for more details. (Upcharge applies.) antimicrobial@rockymountainhardware.com or 888.788.2013.

The use of CuVerro® antimicrobial copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. CuVerro® is a registered trademark of GBC Metals, LLC and is used with permission (RM-0002-1204).

* Testing demonstrated effective antibacterial activity against Methicillin-Resistant Staphylococcus aureus, Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, and E. coli O157:H7. See www.CuVerro.com for more details.

Copper

Keypad Entry System

Our state-of-the-art keypad locking system allows for secure keyless entry to any door without compromising your design aesthetic. These keypad escutcheons are available in 5 styles to compliment our mainline door hardware. Select any of our 10 patina options as pictured on pages 14–15.

KEYPAD ENTRY SYSTEM

PART #	STYLE
KEY400	RECTANGULAR
KEY300	STEPPED
KEY200	METRO
KEY700	ARCHED
KEY500	CURVED

Shown (KEY400) Rectangular in silicon bronze, brushed patina.

This keypad is a separate piece from your door hardware and can be mounted on or off of the door; however, we recommend mounting off of the door.

This system works with your choice of an electronic mortise lock or electronic strike with either 12 or 24 Volt power.

Electronic Mortise Locks

can be integrated into all Rocky Mountain Hardware mortise lock entry sets. The power must be hardwired through the door. This setup requires a power transfer to the door that can be accomplished with an electrified hinge which can be incorporated into any Rocky Mountain Hardware concealed bearing hinges. Doors must be prepped for wiring transfer.

Electric Strikes

can be integrated into all Rocky Mountain Hardware mortise lock sets. This application does not require the power transfer through the door except in double door applications where the strike will be mounted on the inactive door. Single doors will need to have power hardwired from the keypad to the jamb to operate the electric strike.

Please call us for more detailed information on this option, 888.788.2013.

Rocky Mountain Hardware's Hospitality and Commercial Division

can work directly with you to find the best solution for all of your projects. From small modifications of an existing collection to a completely original idea, our design and engineering team can create anything imaginable, all tailored to your exacting specifications.

Rocky Mountain Hardware has extensive experience working with large-scale projects worldwide and welcomes the opportunity to work with you to ensure your job is a success.

Contact your local Rocky Mountain Hardware Representative or call us directly so we can discuss your needs and budgets on a project-by-project basis.

Visit us online at www.rockymountainhardware.com/hospitality or email us at info@rockymountainhardware.com.

Follow these steps to customize our door hardware perfectly to your style

1

Select an escutcheon (back plate) style.

We have 13 styles to choose from. Look through these pages to see pictures of each style in setting as well as simple product shots on white background. Each style has many different sized plates to carry your selected design from the entry to the bathroom. See pages 16–97.

2

Select a handle.

We have many handle options, including grips, levers and knobs. Grips are typically used on larger entry doors, while levers and knobs can be used for either entry or interior doors. Grips and levers or knobs are often mixed on the same project to accommodate different needs. See pages 98–111.

3

Select a patina.

We have 10 patina finishes—with two different base alloys. Our silicon bronze finishes are more copper/brown in appearance, while our white bronze finishes are more pewter/silver in appearance. See pages 14–15.

4

If you have selected our **Designer Collection**, you will also need to select a choice from either our Italian leather (pages 34–35) or our bronze texture options (pages 26–27).

5

Contact your local authorized Rocky Mountain Hardware dealer to help carry your design selections throughout your project. If you do not already know your local dealer, please call us directly to find the one best suited to serve your needs. 888.788.2013

6

Below is a list of details that your dealer will need to finalize for your order.

Number and location of doors—then the following information for each door.
Handing of each door (see diagram on page 191).

Door stile width. The stile is the vertical flat portion of the door where the hardware mounts. The dimension needed is from the edge of the door to where the flat portion ends/molding or other detail begins.

Door Thickness.

Are doors already bored for hardware? If yes, you will need measurements of these holes. *(If not, boring instructions are included with the hardware.)*

- These luminaires must be mounted or supported independently of an outlet box.
- Glass is individually hand formed for every fixture, thus no two pieces will look exactly alike.

Light Emitting Diodes (LED) Lighting Information

- Applicable fixtures are available in your choice of incandescent or LED lamp types. LED options carry an up charge. Except the WS590, C405FB, and PE465 & WS419 Towne Collection at this time.
- Call for custom LED dimming options.
- Low Voltage
- Green—no lead no mercury
- 50,000 hours of lamp life
- Instant on/off performance
- Energy savings up to 80%
- Meets California's Title 24 lighting requirements

LOCK FUNCTIONS

Entry (single cylinder)

This is a locking set with operable handles that has a keyed cylinder on the exterior side of the door and usually a turn piece on the interior side (typically used on primary exterior doors).

Entry (double cylinder)

This is a locking set with operable handles that has a keyed cylinder on both sides of the door (typically used on primary exterior doors).

Dummy—Single

This is a set with an inoperable handle on one side of the door (typically in conjunction with roller catches, flush bolts or surface bolts).

Dummy—Full

This is a set with inoperable handles on both sides of the door (typically in conjunction with roller catches, flush bolts or surface bolts).

Passage

This is a non-locking set with operable handles (typically used on doors that do not require security or privacy such as closets, laundry or utility rooms, pantry, mechanical rooms and so on).

Patio

This is a locking set with operable handles that is locked by a turn piece from the interior side, but has no keyed access from the exterior (typically used on secondary exterior doors).

Privacy (mortise bolt or mortise lock)

This is a locking set with operable handles that is locked by a turn piece from the interior side and can be unlocked by an emergency release key from the exterior side (typically used on bedroom and bathroom doors).

Privacy (spring latch)

This is a locking set with operable handles that is locked by a push button on the escutcheon from the interior side of the door and can be unlocked by an emergency release key from the exterior side (typically used on bedroom and bathroom doors).

Push/Pull

This is a set with inoperable grip handles and/or escutcheons. The set can have locking capacity in single cylinder, double cylinder or patio applications and is available in full or single dummy as well (typically used for commercial applications).

Lock Trim

Lock Trim is the portion of the set usually attached to the surface of the door and consists of these parts:

Escutcheon

Back plate that attaches to the door.

Handle

The portion of the set you grab to pull or rotate. The handle options are grips, levers, knobs or ring pulls.

Swing Cover

The flap that covers the cylinder or the emergency release access.

Thumb Piece

This piece retracts the latch bolt on a thumb latch entry lock set.

Turn Piece

This piece operates the dead bolt or mortise bolt on the interior side of a locking set.

LOCK MECHANISMS

Lock Mechanisms are the portion of the set operated by the handles, cylinders, thumb latches and turn pieces:

Dead Bolt

A locking mechanism that is separate from the latching mechanism in a door set. A dead bolt can be locked by a key or turn piece. Rocky Mountain Hardware can provide separate dead bolt trim that is used above a handle set or can incorporate the dead bolt and handle trim onto the same escutcheon.

Mortise Bolt

A locking mechanism that is separate from the latching mechanism and is operated by a turn piece. It is usually used for interior applications to provide privacy on bedroom and bathroom doors.

Mortise Lock

This mechanism integrates the locking and latching mechanisms into a single cartridge style lock. The mortise lock is available in a variety of functions such as entry, privacy, passage and so on.

Multi-Point Lock Mechanisms

Mechanisms that latch the door at several points along the length of the door instead of a single point in close proximity to the handle. Multi-point locks are provided with the French doors made by most of the major window manufacturers. Due to the variety of multi-point sets available, Rocky Mountain Hardware recommends that a copy of the existing lock trim or a factory drawing be sent to us so our trim can be machined correctly to match the lock in the door.

Spring Latch

A latching mechanism operated by the handles.

CYLINDERS

Cylinders are the portion of a lock where the key is inserted to lock or unlock the set. There are several different kinds common to Rocky Mountain Hardware sets:

Mortise Cylinders

Mechanisms that are threaded into mortise locks, secured by a set screw through the edge of the lock and vary in length for different door thicknesses.

Rim Cylinders

Mechanisms used in dead bolts and are mounted with screws from the opposite side of the door. They do not vary in length, but the mounting screw and tailpiece length varies according to the door thickness.

American or U.S. Cylinders

Refers to the type of cylinder used with several types of multi-point lock sets. These cylinders are attached to the escutcheon and do not vary in length, but the tailpiece length varies according to the door thickness.

European Profile Cylinders

Another type of cylinder used with multi-point lock sets. These cylinders slip through the exterior escutcheon, the door and the interior escutcheon and are held in place by a set screw through the edge of the lock and vary in length for different door thicknesses.

ADDITIONAL TERMINOLOGY

Active Door

The primary door in a pair of doors and typically has an operable handle set.

Butt Hinges

Hinges with one leaf mortised to the jamb and one leaf mortised to the edge of the door.

Cabinet Roses

The back plates behind the cabinet knob or pull.

Clavos

Decorative nails typically applied to the surface of the door.

Edge Pulls

Used to retrieve a pocket door from the pocket.

Emergency Release

This term refers to the capability of a lock to be unlocked from the exterior side in case of an emergency situation. This is an aspect of most interior privacy lock sets. Rocky Mountain Hardware provides an emergency release key with our privacy lock sets.

Flush Pulls

Recessed pulls used on sliding doors such as pocket or bypass doors.

Handing (hinged doors)

Indicates where the door is hinged and the direction it swings.

Please see chart below.

- PLEASE NOTE:
1. Handing of doors is always determined from the outside.
 2. The outside of an exterior door is the street/entrance side.
 3. The outside of a room door is the hall side.
 4. The outside of a closet door is the room or hall side

Lever Handing

Inactive Door

The secondary door in a pair of doors. The inactive door swings or slides like the active door and is often secured with flush or surface bolts and typically has inoperable handles.

Ornamental Hinge Strap

A decorative piece of metal applied to the surface of the door to mimic a strap hinge.

Strap Hinges

Hinges that have one leaf applied to the surface of the jamb and one leaf attached to the surface of the door.

Spring Assist

Each handle Rocky Mountain Hardware produces has an additional spring attached to the handle and the escutcheon that returns the lever, knob or ring to the neutral position; this mechanism eliminates sagging handles.

Handing (sliding door)

Indicates the direction the door slides.

Please see chart below.

Sliding Door Handing

- PLEASE NOTE:
1. All views are shown from the exterior side.
 2. Active Panel is the locking panel and its location must be verified.

Rocky Mountain Hardware uses the same key style for all of these cylinders so that all can be keyed to the same key.

Rocky Mountain Hardware stands behind all of our bronze products with a lifetime guarantee on material and workmanship. In addition, the internal mechanisms, including all locks, latches, etc., are guaranteed for 50 years from the date of sale to the original user. Rocky Mountain Hardware will repair or replace the defective product or parts that fall within these guidelines. When necessary, a proof of purchase dated within the warranty period may be required. The patina finish applied to our bronze products is known as a "living finish" which means it will change with time, touch, climate, etc. Because each product will be exposed to a varying set of conditions, we do not warranty the finish of our products. Additionally, we do not warranty the leather as it will also change with the elements of its surroundings. Rocky Mountain Hardware will not assume liability for any labor charges regarding the removal or reinstallation of the products; nor will we cover any freight, postage, or handling expense related to the product. Damages caused by accident, misuse, abuse, or improper installation are not covered by this warranty.
